He made him imply that Emily was miserable in her marriage to Felix, due to Felix's lack of concern for other people and her feelings. Without John's knowledge, Felix had created Ice-Nine, without maintaining records of his discovery. Shortly before he died, in the Christmas vintage in Cape Cod, he showed the isotope to his children. The Hoenikker brothers divided the ice and nine among them. Frank used it to buy a job as an important general in the replacement of the island of San Lorenzo. Angela changed his in exchange for marriage to the handsome Harrison Conners, a scientist used in the research of high secret weapons for the United States. Zinka stole the Newt part in Ice-Nine for the Soviets government. Meanwhile, John was hired to write an article about Julian Castle, a multinsary philanthropist that lives in San Lorenzo. In the avión to the island, John met Lowe and Hazel Crosby and Horlick and Claire Minton. Lowe and Hazel were traveling to San Lorenzo to open a bicycle fabric because the island did not legislated labor restrictions. Horlick was the new American ambassador to San Lorenzo. Angela and Newt also occupied the avión; They were on their way to a celebration of Frank's commitment to Mona, the beautiful daughter adopted from "Pope" Monzano, the dictator of the island. All residents of San Lorenzo were practitioners of Bokononism, a religion created by Bokonon. When Bokonon and his friend McCabe arrived for the first time to San Lorenzo, they wanted to turn the island into a utopia. San Lorenzo had a tumultuous history, conquered and claimed by several nations at various times. The island was completely inútil. When McCabe and Bokonon affirmed his authority, no one intervened. McCabe and Bokonon realized no amount of legal and economic reform would provide island residents with a good standard of living.Bokonon offered comfort to the inhabitants of the island through the creation of an eponymous religion based on happy lies. At the request of Bokonon, McCabe prohibited bokononism and made its practice punishable by death. Thus, forbidden, religion gave emotion and understandable meaning to the life of the impoverished masses of the island. Each ruler since then, including, Pope Monzano, participated in the charade. On the island, Monzano, with terminal cancer, called Frank his successor. Uninterested in the responsibilities of work, Frank asked John to take his place as the next president of San Lorenzo. John rejected the position until Frank told him he'd marry Mona as part of the bargain. Monzano gave his blessing to the plan and wished them luck before taking the last Bokononist rites. John briefly considered lifting the ban on bokononism, but realized that he did not have the capacity to provide adequate food, housing and social services to the population. He therefore decided to continue the farce of his predecessors. During the ceremony in honor of the hundreds of martyrs from San Lorenzo to democracy, John planned to announce his assumption of the presidency. During the ceremony, Monzano's assistant physician, Dr. von Koenigswald informed him that Monzano had committed suicide. Looking at the body, John realized that Monzano's condition could only have been caused by ice ingestion and that, by extension, Felix's experiments to create the isotope had been successful. When John demanded that Frank, Newt and Angela come to Monzano's bedroom, they confessed that they had divided the horrible creation of Felix among themselves after his death, although they could not explain why. They cleaned the room by melting the ice fragments. They decided to take a break before burning the bodies to go to see the ceremony for the hundreds of martyrs.La Ceremonia, un Avia'n Choco? Against Los Acantillates Acantilled Monzano Castle. A glide engendered, taking half of the castle along with the body of Monzano at sea. All the water in the world became ice in seconds. Shortly after the disaster, most of the island's survivors, including Mona, committed suicide. John, Frank, Newt and the Crosby survived for six months. John wrote this narrative, the cradle of Cat, as a record of what had happened, while Newt painted, Hazel sewn, Lowe cooked, and Frank studied ants. Bokonon finished writing Bokonon's Books, as he commented on human stupidity, stupidity.
